Know About Process Map

It is a hierarchical method for displaying processes that illustrates how a product or transaction is processed. It is a visual representation of the workflow either within a process or an image of the whole operation. Process Mapping comprises a stream of activities that transforms a well-defined input or set of inputs into a pre-defined set of outputs.

Tips for success: Good code is its own best documentation. As you're about to add a comment, ask yourself, 'How can I improve the code so that this comment isn't needed?' Improve the code and then document it to make it even clearer.
