## Know About New Launches

### Ziac SMS

ZiacSMS software is designed to send group SMS to customers / clients in a simple, user friendly and cost effective manner. ZiacSMS is an interactive SMS software that uses push / pull technology.

The SMS are sent using the mobile handset connected to your own PC with a USB cable (Data Cable). The SMS can be sent through any GSM mobile service provider and cost is as per the scheme offered by the service provider.

The software sends the message to the list of mobile phone numbers listed in any excel file.

### Health Tips

#### Pork Awareness

Try this and see whether the pork you bought has worms. Most men love to eat this, so watch out before it's too late. If you pour Coke (yes, the soda) on a slab of pork, wait a little while, you will SEE WORMS crawl out of it. A message from the Health Corporation of Singapore about the bad effects of pork consumption is Pig's body contains MANY TOXINS, WORM and LATENT DISEASES.

### Know Your Words

**Table** : A logical unit of storage, used by an Oracle database, that is made up of one or more operating system files. Each table, index or other object that requires storage is located on a tablespace.

**SQL**, at its simplest, is a basic language that allows you to "talk" to a database and extract useful information. With SQL, you may read, write, and remove information from a database.

**ODBC** is Open Data Base Connectivity, which is a connection method to data sources and other things. It requires that you set up a data source, or DSN using an SQL driver or other driver if connecting to other database types. Most database systems support ODBC.
