Food For Thought : By one of our most esteemed Customer..... Mr.Parameswara

1.

Concept Of 5S from Japanese Management .

As you already know Japan is one of the most developed country in the world. A popular saying "Successful people will not do different things, but they do the things differently."

Lets have a look at the below 5s concept which is implemented in Japan's work style.

1. Seire (Sort) : Distinguish between necessary and unnecessary items in gemba* and discard the latter.
2. Seiton (Straighten): Arrange all items remaining after seiri in an orderly manner.
3. Seiso (Scrub): Keep machines and working environments clean.
4. Seiketsu (Systematize) : Extend the concept of cleanliness to oneself and continuously practice the above three steps.
5. Shitsuke (Standardize): Build self-discipline and make a habit of engaging in the 5S by establishing standards

* A term commonly used in Japan is gemba kaizen. It is an expression that conveys commitment to continuous improvement of practices and processes as a business philosophy. Translated to English "gemba" means shop floor and "kaizen" means continuous improvement.
