

Why is my computer so slow? How to Fix It?

You... like most other computer users out there are well aware that a computer can become slower and much less reliable over time. While computers are getting cheaper, they are still not that cheap that you can afford to replace them when they become slow! So, how do you fix a slow computer so that it does not become annoyingly slow and so that you remain productive during your daily computer activity?

1. Clean your computer registry

Every Windows computer has a registry. This is effectively the powerhouse of your computer and has a huge impact on the speed of your computer. Without a clean and well organized registry, your Windows system will become very slow and is vulnerable to corruption, freezing, and crashing. A quality registry cleaner is an important part of the regular maintenance of your computer. This will repair damaged registry files, remove errors on your computer, reorganize your registry and ultimately fix a slow computer.

2. Use a quality virus scan software

Viruses and Spy ware are the number one cause of computer problems and this therefore is a common reason for why your computer is slow. Often virus and spy ware can also be very difficult to detect.

To ensure your computer is protected and runs at optimal speeds at all times you need to ensure that your computer protection is updated and runs every week.

3. Fix your computer start up

Right – next step is to look at the number of programmes that your computer is running during start up. By reducing the number that load on windows boot – up you will notice that your computer will immediately start to speed up and will run faster during daily operation... just another way to fix a slow computer.

4. Disk Clean Up and Disk Defrag

Have you tried to use your inbuilt disk clean up and disk defragmenter to help fix your slow computer? Your Windows computer actually comes with a couple of utilities that are designed to help you speed up your slow computer.

Go to Programs, Accessories, System tools and then go to disk clean up. Run this utility followed by a disk defrag. This will free up some space on your computer.

Brain Teaser

What common word has Four vowels, one after the other?

Last edition's answer

The train takes 18 minutes.
The front of the train has to initially travel 10k to leave the tunnel, and then a further 0.5k until the rear of the train has left the tunnel - a total of 10.5k.
Which takes 60 *
 $(10.5 / 35) = 18$ minutes.

Thought for the day

IF YOU WANT REAL PEACE
DON'T TALK TO YOUR FRIENDS
TALK WITH YOUR ENEMIES

Joke of the day

Shopkeeper: Would you like to buy a pocket calculator, sir?

Customer: No thanks! I know exactly how many pockets I have..!

Bengaluru Decoded.

Marathahalli

Halli in Kannada means village. A fighter aircraft named Marut had an accident in this area; So the area is called Marathahalli. The famous Outer Ring Road of Bangalore passes through Marathahalli.

This is to inform that Mr. Surya Pawan has been terminated from the services of Ziac with immediate effect. Any person/entity dealing with him financially / otherwise thinking him to be part of Ziac is doing so at his own risk.
Ziac Softwares holds no liability for the same.

ZIACIANS DAY OUT

Make your Life Beautiful....

A professor stood before his Philosophy class and had some items in front of him. When the class began, wordlessly, he picked up a very large and empty mayonnaise jar and proceeded to fill it with golf balls.

He then asked the students if the jar was full. They agreed that it was.

The professor then picked up a box of pebbles and poured them into the jar.

He shook the jar lightly. The pebbles rolled into the open areas between the golf balls.

He then asked the students again if the jar was full. They agreed it was.

The professor next picked up a box of sand and poured it into the jar.

Of course, the sand filled up everything else. He asked once more if the jar was full.

The students responded with an unanimous "yes."

The professor then produced two cups of coffee from under the table and poured the entire contents into the jar, effectively filling the empty space between the sand. The students laughed.

"Now," said the professor, as the laughter subsided, "I want you to recognize that this jar represents your life.

"The golf balls are the important things - your God, family, your children, your health, your friends, and your favorite passions - things that if everything else was lost and only they remained, your life would still be full.

"The pebbles are the other things that matter like your job, your house, and your car.

"The sand is everything else--the small stuff. "If you put the sand into the jar first," he continued, "there is no room for the pebbles or the golf balls.

"The same goes for life. "If you spend all your time and energy on the small stuff, you will never have room for the things that are important to you.

"Pay attention to the things that are critical to your happiness. "Set your priorities. "The rest is just sand."

One of the students raised her hand and inquired what the coffee represented.

The professor smiled. "I'm glad you asked.

"It just goes to show you that no matter how full your life may seem, there's always room for a cup of coffee with a friend."
